EDUCATION

- **Kalinga Institute of Industrial Technology** — Bhubaneshwar, India
  BTech in Information Technology; CGPA: 8.95 — *July. 2019 – June. 2023*

TECHNICAL SKILLS

Coursework: Data Structure & Algorithms, OOPs Concept, Problem Solving, DBMS, SDLC.
Languages/Frameworks: C/C++, Java, HTML/CSS, JavaScript, NodeJs, ExpressJs, ReactJs, NextJs.
Database: MongoDB, Firebase
Tools: Git, Linux, Visual Studio Code, Eclipse, Figma.

EXPERIENCE

- **OpenText** — Bengaluru, India
  Intern — *Jan. 2023 - Present*
  - Utilized **Agile** methodology to **Develop** monthly reports for OCC team Using a Spring Boot application.
  - Implemented **REST API** calls to retrieve necessary data for report generation.
  - Automated the previously manual process of counting data across multiple Excel files and individual profiles, resulting in a **15 - 20 hr/week reduction** in debugging and setup time.

- **EPIKInDiFi** — Bhubaneswar, India
  Intern Trainee — *Jan. 2022 - Jun. 2022*
  - Gained **hands-on** experience in **ReactJS, JavaScript, EDA, and Linux** through training and mentorship.
  - Developed baseline knowledge of software, applications, and technical processes within creating mobile applications, and website functionality using **ReactJs** and **JavaScript**.
  - Utilized EDA tools to improve efficiency and gained experience working with **Linux** operating systems.

PROJECTS

- **Code Dynamics** — - Source Code
  Figma, NextJs, Tailwind CSS, Strapi (CMS), GIT, and hosted on Vercel (.in domain)
  - Code Dynamics project provides DSA solutions for major platforms, including 30K+ solutions, 50+ RRS, and optimized solutions for all programming languages.
  - The project includes a Dynamics sheet for the DSA community and has 150+ users during pre-launch.
  - The web app is dynamic and being made PWA-compatible for easy access.

- **Next Gen UI** — - Source Code
  Dynamic and Intuitive Component Library
  - Created a dynamic and intuitive component library with a vast collection of web components (navbar, footer, cards, buttons, etc.) using NextJs, Tailwind CSS, and Firebase.
  - Built the library with a focus on simplicity and ease of use by providing code in HTML and React and pursuing the goal of converting it into an NPM package.
  - Included **dynamic routing** in the library to enable seamless navigation between the different components.

ACHIEVEMENTS

- I was Web Dev. Lead at **GeeksforGeeks KIIT**
- Earned **5* Badge in C, C++ and DSA**, 4* in **Python**, and completed **30 Days of Code** on **Hackerrank.**
